

DOCUMENT 1: PROBLEM-SOLUTION FIT CANVAS

BOX	CONTENT
1. Customer Segment(s)	Aspiring comic creators, writers, storytellers, students, hobbyists, content creators, educators who lack artistic/drawing skills
2. Problems / Pains + Frequency	Manual comic creation is extremely time-consuming (Daily/Weekly frequency). Requires artistic talent, expensive software (Photoshop/Procreate), multiple iterations. Many story ideas never become comics due to skill barriers
3. Triggers to Act	Need for quick visual storytelling, school/college project deadlines, social media content creation, portfolio building, gift creation for friends/family
4. Emotions (Before → After)	Before: Frustrated, intimidated, creatively blocked, overwhelmed. After: Excited, empowered, proud, accomplished, inspired
5. Available Solutions (Pros & Cons)	Pro: Canva (easy but templated/limited), Photoshop (powerful but complex/expensive), Fiverr/comic artists (quality but slow/costly). Cons: None offer AI-generated narrative + matching visuals in one seamless click
6. Customer Limitations	Budget constraints (can't afford professional artists), Device limitations (need web-based solution), No drawing/sketching skills, Time constraints, No knowledge of comic layout/panel structure
7. Behavior + Intensity	Frequent searches for "how to make a comic" / "AI comic generator" / "comic maker online" (High intensity). Many start but few finish due to complexity. Active in Reddit (r/comicbooks, r/aiart), DeviantArt, YouTube tutorials
8. Channels (Online/Offline)	Online: Google search, YouTube, GitHub, Reddit, Twitter/X, Instagram, college project groups, Hackathons. Offline: Classroom assignments, hobby clubs, comic conventions
9. Problem Root / Cause	Fundamental gap between creative imagination and technical/artistic execution skills. Lack of accessible all-in-one tools handling story generation + illustration + layout + export
10. Your Solution	ComicCraft - AI web application using Google Gemini 1.5 Flash (5-panel outline planning) + Gemini 1.5 Pro (narration/dialogue generation) + Stable Diffusion / FLUX.1-schnell (panel illustrations) + FPDF2 (multi-page PDF export). Input: prompt, character name, setting, tone, art style → Output: complete 5-panel comic with interactive preview + downloadable PDF
