

COMICCRAFT

DOCUMENT 6: CUSTOMER JOURNEY MAP

PHASE OF JOURNEY	STAGE 1: DISCOVERY	STAGE 2: CREATION	STAGE 3: EXPORT
Actions	• Searches “AI comic creator online” or “comic story generator” • Finds ComicCraft on GitHub or web search • Reads project README/overview • Opens the web application URL • Reviews the input form and interface • Decides to try generating a comic	• Types a creative story idea/prompt (e.g., “A brave fox exploring an enchanted forest”) • Enters character name (e.g., “Finn”) • Selects setting from dropdown (forest, space, city, beach, castle) • Chooses tone (funny, dramatic, adventurous, romantic, mysterious) • Picks art style (anime, cartoon, realistic, comic) • Clicks “Generate Comic” button • Waits while AI processes (sees loading animation)	• Reviews each of the 5 generated panels • Reads narration captions and dialogue • Examines AI-generated illustrations • Clicks through panels using navigation arrows • Decides the comic looks great • Clicks “Download PDF” button • Chooses save location • Opens the downloaded PDF file • Shares with friends or on social media
Touchpoint	• Google/Bing search results • GitHub repository page • README documentation • Browser address bar • Web app loading/first view	• Input form (index.html) • Character name text input • Setting dropdown selector • Tone radio buttons/select • Art style selector • Generate button • Loading spinner animation • FastAPI backend processing • Terminal/progress logs	• Comic preview page (comic_preview.html) • Panel navigation (prev/next) • Download PDF button • Browser download dialog • File explorer/save dialog • PDF viewer application • Social media share buttons
Customer Thought	“Can AI really create a decent comic?” “Is this tool free?” “How hard is it to set up?” “Let me see what this can do” “I hope it’s easy to use”	“Let me try a sci-fi adventure...” “I hope the art matches my vision” “This is exciting - my first AI comic!” “I wonder how fast it generates” “Will the characters look consistent?”	“Wow, the artwork looks impressive!” “The story actually makes sense!” “The PDF looks professional!” “I want to save this forever” “Let me show my friends”
Customer Feeling	Curious, skeptical, hopeful, intrigued, slightly hesitant	Excited, engaged, creative, impatient, amazed, anticipatory	Satisfied, proud, accomplished, delighted, inspired, eager to share
Process Ownership	Developer / Documentation Team / GitHub Maintainer	Backend AI Pipeline Developer / Frontend Developer	Export Module Developer / Full Team
Opportunities	• Add animated GIF demo in README • One-click “Try Example” button • Quick-start video tutorial (2 mins) • Deployed live demo link on Render/HF Spaces • SEO optimization for search visibility	• Real-time streaming preview of generation • Genre presets (fantasy, sci-fi, horror, romance) • More art style options • Character consistency improvements via face prompts • Auto-save draft functionality	• Direct social media sharing integration • Multiple export formats (PNG, JPG, WebP) • Print-friendly letter size layout • Add watermark/credits option • Email PDF directly
